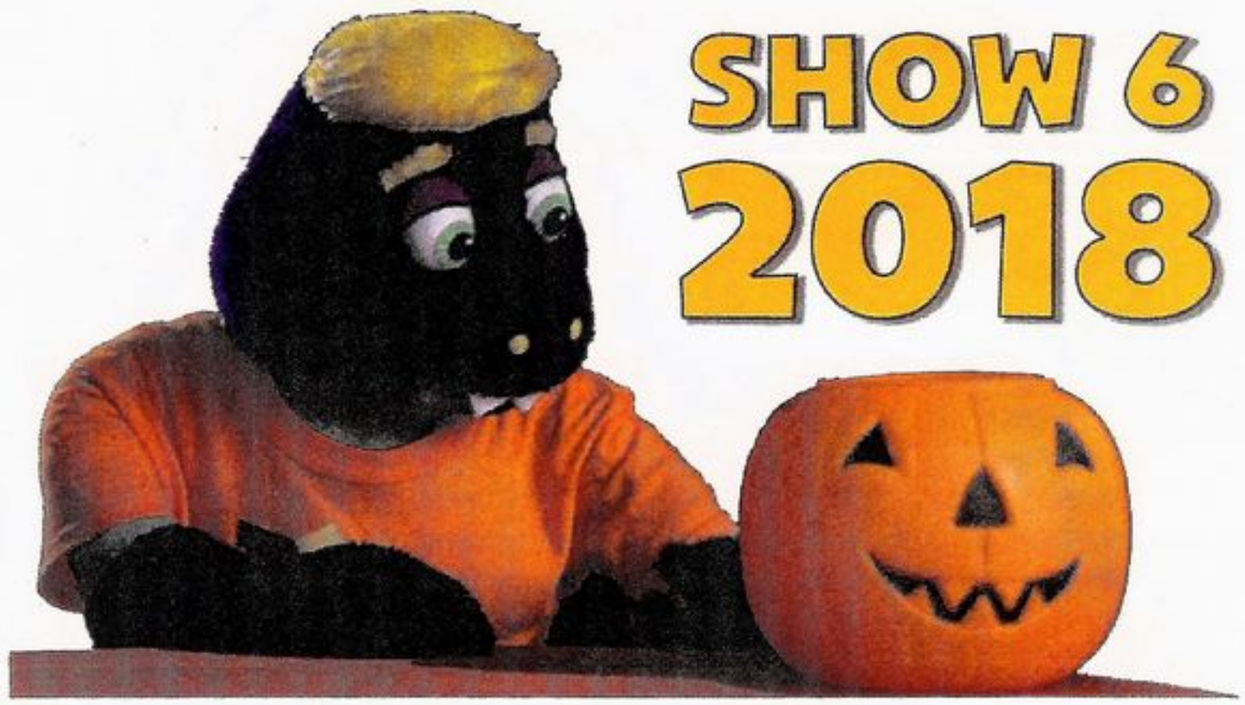
PLAY DATES
OCTOBER 1 – NOVEMBER 4

CHUCK E. CHEESE'S®



SHOW 6 2018

September is over, and you know what that means. It is now CHUCKTOBER! The not-so-spooky celebration that lasts all month at Chuck E. Cheese's is finally here. Show 6 2018 features brand new, Chucktober-themed music videos and comedic sketches from Chuck E. and his pals. Along with the new Chuck E. material, we are happy to bring you music videos from MIKA and Ariana Grande, American Authors, U2 and a fun new song all about All You Can Play from the popular YouTube duo, Girls with Glasses.

So put on your costume and have a Happy Chucktober!

After Show 6 there is only one show left for 2018!
Where has the year gone?

Show 7 (Happy Holidays): November 5 – December 30

Original Content and Character Properties

SHOW AUDIO STANDARDS

The enclosed show will have a volume level difference of 10 dBs between the Live/Birthday shows and the regular show. During non-peak times, the volume can be adjusted between 70 dBs and 80 dBs for the regular show. The General Manager and Technical Manager will use their discretion to determine the correct non-peak volume. The show volume should not drop below 70 dBs or be higher than 80 dBs during non-peak times. During peak hours, the volume will be set to the standard, which is 80 dBs during regular show and 90 dBs during Live/Birthday show. Below are instructions to your Technical Managers on how to properly set and calibrate the amps for this new setting. Once the amps have been set, it is imperative that amps are not adjusted.

Step 1: Make sure you have the proper sound meter and it is set to *Weight C* and *Reaction Slow*. This must be done in the morning when there is no ambient noise.

Step 2: For Studio C, have the control panel set at 100%. For all other shows, have the volume adjustment set to its highest level.

Step 3: On the Live/Birthday shows, adjust your amp until your sound meter reads about 90 dBs.

Step 4: Confirm your regular show is about 80 dBs in the show room and game room.

Step 5: Once you have confirmed the settings, remove the amp knobs if possible. If you cannot remove the knobs, then find a way to make it difficult to randomly adjust the knobs. If none of the above can be done, then mark the proper volume level on your amp.

Step 6: Unplug the sense microphone(s) from the back of the Symetrix.

Step 7: On the next directional, go over the volume settings with the managers.

With these settings, the loudest the show will go is about 90 dBs. If you have any questions, please get in contact with your DT or RT.

Chuck E. Cheese's Show 6 2018 (Chucktober)
